  Invite collaborators

Quick setup — if you've done this kind of thing before

  or   HTTPS   SSH   git@github.com:legioner9/Opus.git   ⎘

Get started by creating a new file or uploading an existing file. We recommend every repository include a
README, LICENSE, and .gitignore.

…or create a new repository on the command line

```
echo "# Opus" >> README.md                                                                    ⎘
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin git@github.com:legioner9/Opus.git
git push -u origin main
```

…or push an existing repository from the command line

```
git remote add origin git@github.com:legioner9/Opus.git                                        ⎘
git branch -M main
git push -u origin main
```

…or import code from another repository
You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

  Import code

💡 ProTip! Use the URL for this page when adding GitHub as a remote.
